

PARCELION A WAREHOUSE MANAGEMENT SOFTWARE

Minimal.
Simple.
To The Point.

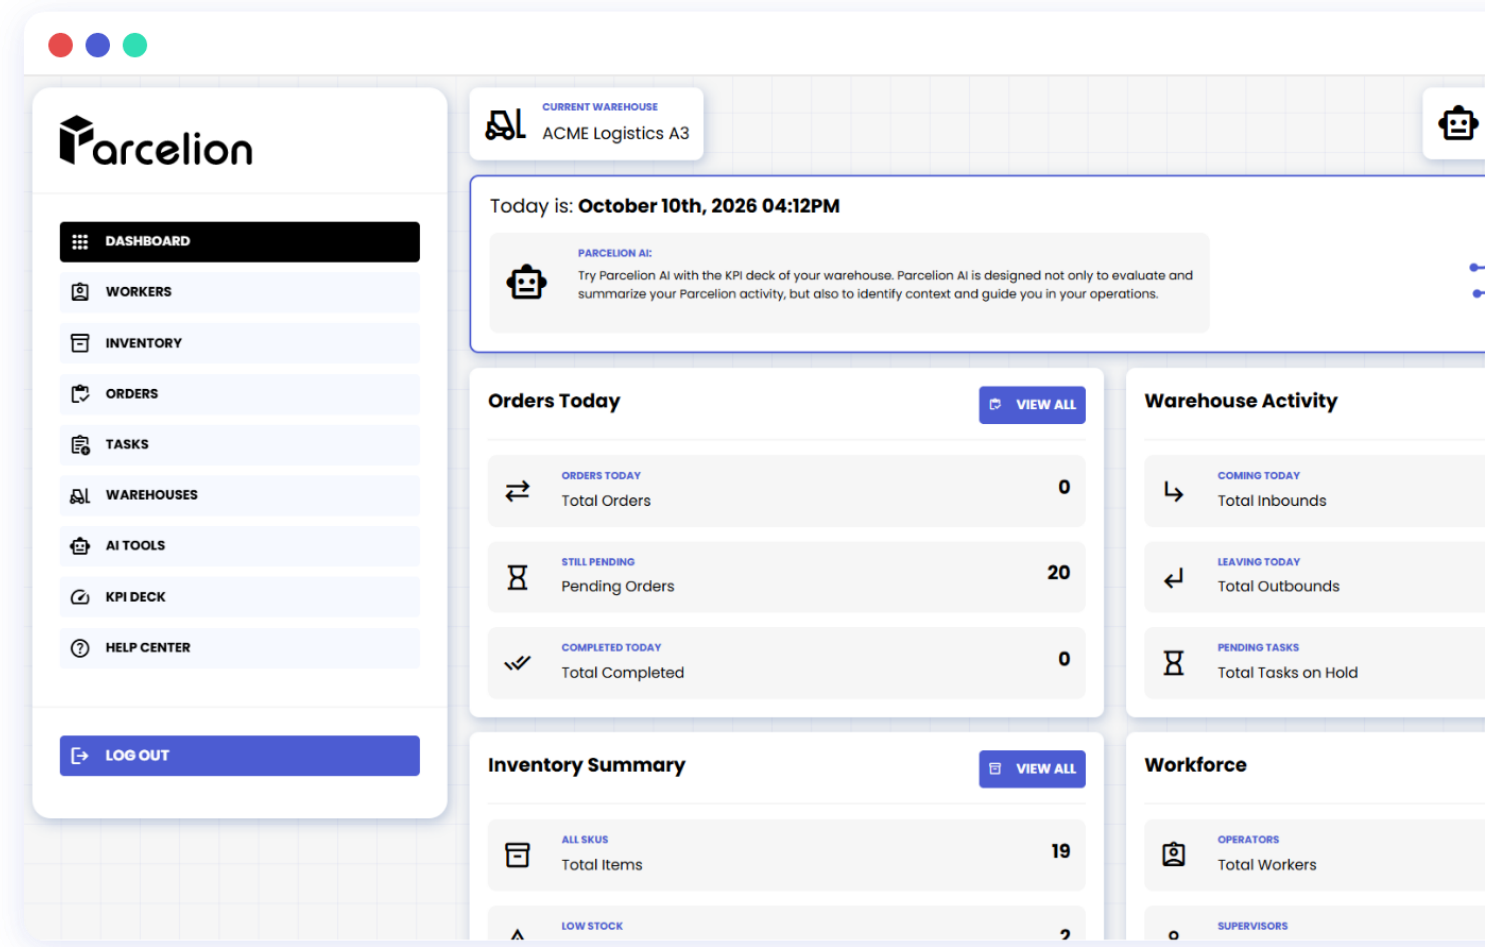

www.parcelion-wms.com

support@parcelion-wms.com

Parcelion is a warehouse management software designed to simplify inventory, order processing, and daily warehouse operations. By bringing essential workflows, QR code scanning, and AI-powered insights together in one platform, Parcelion helps small and growing businesses manage their warehouses with greater clarity and control.

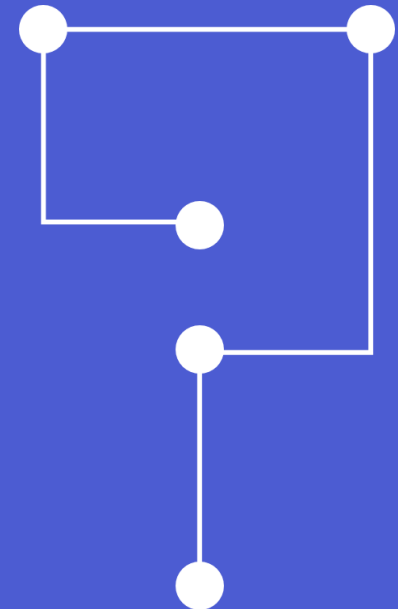

THE PROBLEM

Many warehouse management systems are packed with complex features, costly implementations, and workflows designed for large enterprises. For small and growing businesses, this often means unnecessary overhead, steep learning curves, and tools that are harder to manage than the operations they are meant to simplify.

Businesses need a more straightforward way to organize inventory, manage orders, and gain operational visibility without the complexity they don't need.

THE PLATFORM

Inventory Management

Organize your stock, manage inventory items, and identify products using QR codes.

Order Management

Manage inbound and outbound orders, track order statuses, and scan items directly into orders.

Task Management

Coordinate warehouse activities, assign tasks to workers, and keep daily operations organized.

User Management

Create and manage user accounts, assign roles, and control access to warehouse operations.

AI TOOLS

AI-Powered KPI Analysis: Turn warehouse performance metrics into actionable insights with AI-assisted analysis of your operational data.

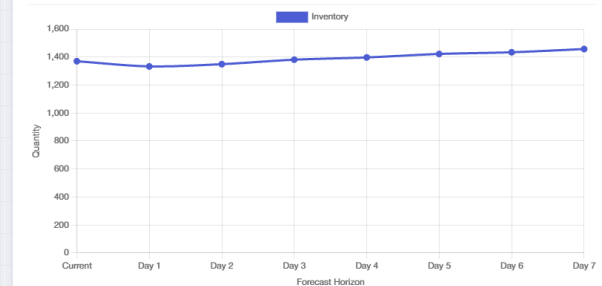

Order Priority Classification: Automatically classify orders by priority to help teams identify urgent requests and organize their workload.

Data-Driven Forecasting: Leverage historical warehouse data and machine learning to forecast operational trends, anticipate future needs, and support more informed planning and decision-making.

Forecasted Inventory for the next 7 Days:

DAY 1:	1333	-37
DAY 2:	1349	-21
DAY 3:	1381	+11
DAY 4:	1397	+27
DAY 5:	1422	+52
DAY 6:	1434	+64
DAY 7:	1457	+87

Forecasted Inventory Chart

It is critical that you exercise caution and use human oversight; do not make mission-critical operational decisions solely based on the Parcelion AI's predictions. We encourage you to use these insights as a valuable resource to inform your strategy, while always applying your professional judgment and validating suggestions with current operational realities.

PRICING

Micro Plan

\$49.99/Month

Warehouse Limit **1**

Total Workers Limit **6**

Inventory Management

ADVANTAGE

Traditional WMS Platforms

- ➔ Complex interfaces and workflows
- ➔ Features designed for large enterprises
- ➔ Specialized scanning hardware may be required
- ➔ Operational data across separate workflows
- ➔ Advanced analytics may require additional tools
- ➔ Costly or complex plans

Parcelion WMS

- ✓ Straightforward, intuitive workflows
- ✓ Essential tools for small and growing businesses
- ✓ QR scanning using a smartphone
- ✓ Inventory, orders, and tasks in one platform
- ✓ Built-in KPI dashboards and AI-powered analysis
- ✓ Clear subscription tiers based on operational needs

GET STARTED

Whether you're managing a small garage, setting up your first warehouse, or growing an established business, getting organized shouldn't be complicated. Parcelion gives you a simple place to manage your inventory, orders, and daily tasks without overwhelming you with features you don't need. Start small, find your rhythm, and grow at your own pace with tools that help you stay in control of your operations. You don't need to be an expert in warehouse management to get started.

Your warehouse journey starts here. Let's make it simpler with Parcelion.
